

Article 10

Public, Educational, and Government Access and Cable Related Fund Acceptance

- This article would create a special revenue account for receipt of monies paid to the Town by cable TV providers.
- The license agreements between the Town and the cable providers requires them to support The Needham Channel and its programming.
- Although payments are currently paid directly to The Needham Channel, the Massachusetts Department of Revenue has determined that cities and towns must establish a special revenue account (as proposed by this article) for receipt of these funds.
- Funds received by the Town will then be paid from the account to the Needham Channel.

The Select Board unanimously recommends adoption of this article.
